Medical Laboratory Sciences (1987) **44**, 412–415

Subject index

Aeromonas sp., 287
AIDS virus nomenclature, 113
Antibacterial activity in urine examined for urinary tract infection, 41
Antibodies, 94, 160, 350
Anticoagulants, 187
Anti-Cs^b: the finding of the antibody antithetical to anti-Cs^a, 94
Antiglobulin test, 160
Anti-haemophilic globulin and salivary secretor status in healthy Indians, 215
Anti-HTLV III, 97
Aperture impedance, 320
Application of robotics in the medical laboratory, 378
Atherosclerosis, 267
Automated haematology: a comparative study of cell counting and sizing using aperture impedance and flow cytometric systems, 320
Automated technique to measure breakdown products of C3 specificities by peak-rate nephelometry, 331
Automatic measurement of mean platelet volume, 190

Bacteria, 50
Bacteriology, 371
Basic fuchsin homologues. Are pure dyes really necessary? 398
Biochemistry for sick and pre-term neonates, 165
β lactamase-negative, 285
Blood culture, 150
Blood packs, 356
Book Reviews:
Advances in Renal Physiology—*C.J. Lote (Editor)*, 112
A Glossary of Computing Terms—*The British Computer Society Schools Committee Glossary Working Party (Editors)*, 301
A Manual of Hemotherapy—*H.B. Anstall and P.M. Urie*, 110
An Introduction to Immunocytochemistry: Current Techniques and Problems—*J.M. Polak and S. Van Noorden*, 408
An Introduction to Pharmacokinetics—*B. Clark and D.A. Smith*, 203
A Synopsis of Endocrinology and Metabolism—*I. Ramsay*, 199
Automated Blood Counts and Differentials—A Practical Guide—*J. David Bessman*, 200
Automation and Quality Assurance in Haematology—*R.M. Rowan and J.M. England (Editors)*, 200
Bailey and Scott's Diagnostic Microbiology—*S.M. Finegold and E.J. Baron*, 109
Clinical Chemical Pathology—*C.H. Gray, P.J. Howorth and M.G. Rinsler*, 199
Color Atlas of Clinical Hematology—*B.H. Hyun, G.L. Gulati and J.K. Ashton*, 410
Colour Atlas of Cardiovascular Pathology—*M.J. Davies*, 106
Controlling Airborne Contaminants in the Workplace.—British Occupational Hygiene Society Technical Guide No. 7—*T.L. Ogden* (Editor), 409
Cytology of Body Cavity Fluids—*E.B. Butler and C.M. Stanbridge*, 199
Diagnostic Enzymology. Analytical Chemistry by Open Learning—*David Hawcroft*, 408
Diagnostics—*H.K. Hamilton* (Ed. Director), 411
Dictionary of Pharmacology—*W.C. Bowman, Anne Bowman and Alice Bowman*, 111
Fundamentals of Immunology—*O.G. Bier, W.D. da Silva, D. Grotze and I. Mota*, 302
Gel Electrophoresis of Proteins—*M.J. Dunn (Editor)*, 107
General Microbiology—*Hans G. Schlegel, assisted by Karin Schmidt*, 202
Genetic Control of the Susceptibility to Bacterial Infection. Current Topics in Microbiology and Immunology. Volume 124—*D.E. Briles (Editor)*, 301
Handbook of Experimental Immunology, Vol. 4. Applications of Immunological Methods in Biomedical Sciences—*D.M. Weir (Editor)*, 202
Heinemann Medical Dictionary—*B. Lennox and M.E. Lennox*, 205
Interpretation of Diagnostic Tests—A Synopsis of Laboratory Medicine—*J. Wallach*, 204
Introduction to Medical Laboratory Technology—*F.J. Baker and R.E. Silverton (with D. Kilshaw)*, 110
Introduction to Nuclear Radiation Detectors—*P.M. Cooper*, 204

C3, 331
Calcium, 187
Candida albicans, 137
Cell counting, 320
Characterization of *Aeromonas sp.* in the API ZYM system, 287
Chromic chloride, 401
Chromogenic *Limulus* amoebocyte lysate assay for endotoxin: comparison of three commercial products, 89
Clinical applications of tumour markers, 361
Clinical chemistry, 6
Computerised generation of numbers for labelling blocks of resin-embedded tissue for Transmission Electron Microscopy, 92
Coronary heart disease, 267
Counterimmunoelectrophoresis and double immunodiffusion techniques in the detection of *Legionella pneuomophila* antibodies, 334
C-reactive protein, 15
Cryptosporidiosis, 280
Culture, 50
Cytochemical, electrophoretic and chromatographic studies of non-specific esterases in acute myeloid leukaemia, 20
Cytology, 84
Cytotoxic T cells, 141

Detection of anti-HTLV III: modification of a commercial enzyme immunoassay, 97
Detection of heavy chain diseases in Hong Kong, 1984–85, 130
Development of luminescence immunoassays, 249
Dot-blot purification of the Kidd blood group antigen, 294
Double labelling technique for the analysis of lymphocyte sub-sets on a single laser flow cytometer, 192
Duodenal ulcer, 137
Dyes, 398

Editorial policy, 101
Education in the medical laboratory sciences: the past, and future developments, 388
Effect of *in vitro* sialylation of human fibrinogen, 119
Elastic fibres, 237
ELISA, 137
Endotoxin, 89
Entamoeba histolytica, 396
Enzyme immunoassay, 97
ESR re-examined, 215
Esterases, 20
Evaluation, 6
Evaluation of a new commercial urine transport system, 341

Feulgen hydrolysis profiles of a metastatic lung tumour in lymph node and a primary breast carcinoma, 309

Fine needle aspiration, 84
Five-day platelet storage: a comparison of *in vitro* function using various blood packs, 356
Flow cytometer, 192, 320
Fluoroquinolones, 59
Folate, 33
Fuchsin, 398

Generation of cytotoxic T cells to cytomegalovirus in patients with cervical intraepithelial neoplasia, 141
Glucose-6-phosphate dehydrogenase, 125
Guidelines, 6

Harnessing the red cell for immunoassays, 66
Heavy chain diseases, 130
High sensitivity thyrotropin assays in patients with severe non-thyroidal illnesses: a first-line screening test, 312
Histochemistry, 237
Histopathology and bacteriology: personal predictions for the next seventy-five years, 371
History, 393
Human breast milk: laboratory detection of enzymes, and their use of markers for control of the pasteurisation process, 345
Hypercalcaemia, 115
Hypothesis supporting the primary role of increased platelet activity in atherosclerosis and coronary heart disease, 267

Identification, 350
Immunoassays, 66, 249
Immunodiffusion, 334
Immunology: the sciences and service of the future? 376
Immunoperoxidase staining, 3
Improved multipoint technique for the routine microbiological examination of urine specimens, 290
Influence of future change on medical laboratory management, 383
Institute of Medical Laboratory Sciences, 393
Instructions to authors, 101
Instrumentation, 6
Intrinsic factor antibody seroconversion, 326

Labelling, 92
Legionella pneumophila, 334
Letters to the Editor:
  Antibiotic sensitivity—*Hazel Brown*, 299
  Quality assurance—*T. Booth*, 198, 299
  Safe and efficient procedure for fine-needle aspiration biopsy—*G. Anderson and H.J. Cross*, 298
Limulus amoebocyte lysate, 89
Lithium-induced hypercalcaemia, 115
Long term preservation of red cell antibody identification panels in low ionic strength solution, 350
Low ionic strength solution, 350
Luminescence, 249
Lymphocyte sub-sets, 192

Management, 383
Measurement of low serum and red cell folate levels: a comparison of analytical methods, 33
Measurement of plasma-ionised calcium: comparison of calcium-titrated sodium heparin and lithium heparin as anticoagulants, 187
Medical laboratory sciences, 388
Medical laboratory sciences: past, present and future, 305
Medical Laboratory Sciences: statement of editorial policy and full instructions to authors, 101
Microbial enzymes in laboratory diagnosis, 170
Microbiological comparison of a new infra-red blood culture system (Bactec NR 660) and a radiometric system (Bactec 460), 150
Microbiological examination, 290
Microscopy to select urine specimens that will not yield significant growth, 45
Microwaves, 3
Milk, 345
Modification of the Wright–Giemsa stain for rapid staining, 88
Modified procedure for the preparation of Romanowsky stain, 86
Multipoint technique, 290
Myeloid leukemia, 20
Myocardial infarction, 15

Neonates, 165
Neoplasia, 141
Nephelometry, 331
New fluoroquinolones: a review, 59
Normal reference range for erythrocyte glucose-6-phosphate dehydrogenase in a Saudi population, 125

Paraffin sections, 3
PAS, 396
Pasteurisation, 345
Penicillin-resistant β lactamase-negative, 285
Place of the Review Article, 1
Platelet activity, 267
Platelet storage, 356
Pre-albumin and C-reactive protein after acute myocardial infarction, 15
Predictions, 371
Preparations of chromic chloride solutions for indirect rosetting: a rapid method, 401
Prevalence mechanism and clinical significance of lithium-induced hypercalcaemia, 115
Progress in the histochemistry of elastic fibres, 237

Quality assessment, 178
Quality assurance. 2. Internal quality control, 73
Quality assurance. 3. External quality assessment, 178

Quality control, 73

Rapid enzyme-linked immunosorbent assay (ELISA) for IgG antibodies to *Candida albicans*: preliminary studies in duodenal ulcer patients, 137
Red cell, 66
Red cell antigen typing using eluted antibodies in a modified antiglobulin test, 160
Ristocetin and von Willebrand factor analysis, 272
Robotics, 378
Romanowsky stain, 86
Rosetting, 401

Saudi population, 125
Screening test, 312
Selection and evaluation of laboratory instrumentation in clinical chemistry: II. Guidelines for selection and evaluation, 6
Semi-automated method for the culture, identification and susceptibility testing of bacteria direct from urine specimens, 50
Short history of the Institute of Medical Laboratory Sciences, 393
Software Review:
MOLGRAF: Molecular graphics for microcomputers—*R.H. Barlow and C.H. O'Donnell*, 304
Staphylococcus aureus, 285
Survey of the incidence of penicillin-resistant β lactamase-negative strains of *Staphylococcus aureus*, 285

Thesis Summaries:
A study of methods for feline leukaemia virus diagnosis—*M.C. Golder*, 406
Determination of glycosylated haemoglobin and its application in comparative studies on subjects with a variety of clinical conditions in the islands of Bermuda—*Dennis Denton Heath*, 197
Development and applications of assays for antigens associated with porcine factor VIII—*N.D. Thomas*, 406
Studies in diagnostic field techniques in Sierra Leone for the identification of *Onchocerea volvulus*—J.M. Goddard, 297
Studies of naturally occurring protease inhibitors in health and disease—*P.M. Trotter*, 405
Studies on a novel androstenedione radioimmunoassay and its application to the neonatal detection of congenital adrenal hyperplasia—*Shirley Thomson*, 196
Studies on erythrocyte glutathione S-transferase activity—*P. Fleming*, 405
The development and application of radioimmunoassays and tissue maintenance techniques to study anterior pituitary hormone secretion—*A.M. D'Souza*, 100
Thyrotropin assays, 312
T lymphocyte surface molecules: structure and function, 220
Transmission Electron Microscopy, 93
Transthoracic fine needle aspiration cytology: a report of five years' experience, 84
Tumour markers, 361

Urinary tract infection, 41
Urine, 50
Urine specimens, 45, 290
Urine transport system, 341
Use of microwaves for rapid immunoperoxidase staining of paraffin sections, 3

Von Willebrand factor, 272

Wright–Giemsa stain, 88

Volume 44 Number 1 January 1987

LEADING ARTICLE

The place of the Review Article, *A. D. Farr* 1–2

ORIGINAL ARTICLES

Use of microwaves for rapid immunoperoxidase staining of paraffin sections, *K. Y. Chiu* 3–5

Selection and evaluation of laboratory instrumentation in clinical chemistry: II. Guidelines for selection and evaluation, *R. Singer, S. F. Clarke, V. A. Crafter, B. C. Gray, D. Kilshaw, J. A. Randell, J. L. Robinson and J. M. White* 6–14

Pre-albumin and C-reactive protein after acute myocardial infarction, *S. P. Harrison* 15–19

Cytochemical, electrophoretic and chromatographic studies of non-specific esterases in acute myeloid leukaemia, *C. S. Scott, M. Patel, J. McLoughlin, I. D. Mackarill, H. J. Limbert and B. E. Roberts* 20–32

Measurement of low serum and red cell folate levels: a comparison of analytical methods, *C. R. Gilois and D. R. Dunbar* 33–40

Antibacterial activity in urine examined for urinary tract infection, *W. N. Penn* 41–44

Microscopy to select urine specimens that will not yield significant growth, *J. L. Baker and N. J. Hayward* 45–49

A semi-automated method for the culture, identification and susceptibility testing for bacteria direct from urine specimens, *C. Henrichsen and A. Moyes* 50–58

REVIEW ARTICLE

The new fluoroquinolones: a review, *D. J. W. Dabbs, D. I. Limb and R. C. Spencer* 59–65

ANNOTATIONS

Harnessing the red cell for immunoassays, *R. R. A. Coombs* 66–72

Quality assurance. 2. Internal quality control, *D Kilshaw* 73–83

SHORT COMMUNICATIONS

Transthoracic fine needle aspiration cytology: a report of five years' experience, *A. R. Chang and H. J. Neal* 84–85

A modified procedure for the preparation of Romanowsky stain, *H. G. M. Ezzat* 86–87

Modification of the Wright-Giemsa stain for rapid staining, *M. J. McDonald* 88

Chromogenic *Limulus* amoebocyte lysate assay for endotoxin: comparison of three commercial products, *B. I. Piotrowicz and A. C. McCartney* 89–91

Computerised generation of numbers for labelling blocks of resin-embedded tissue for Transmission Electron Microscopy, *B. P. Eyden and R. Swindell* 92–93
Anti-Cs^b: the finding of the antibody antithetical to anti-Cs^a, *L. Molthan and D. J. Paradis* 94–96
Detection of anti-HTLV III: modification of a commercial enzyme immunoassay, *A. Barr, W. Muir, B. C. Dow, J. Arnott and I. P. Macvarish* 97–99

THESIS SUMMARY 100

STATEMENT OF EDITORIAL POLICY AND FULL INSTRUCTIONS TO AUTHORS 101–105

BOOK REVIEWS 106–112

Volume 44 Number 2 April 1987

LEADING ARTICLE
Aids virus nomenclature, *J. Coffin et al.* 113–114

ORIGINAL ARTICLES
The prevalence, mechanism and clinical significance of lithium-induced hypercalcaemia, *W. B. McIntosh, E. H. Horn, L. M. Mathieson and D. Sumner* 115–118
The effect of *in vitro* sialylation of human fibrinogen, *V. J. Simmonds and J. L. Francis* 119–124
A normal reference range for erythrocyte glucose-6-phosphate dehydrogenase in a Saudi population, *M. A. F. El-Hazmi and A. S. Warsy* 125–129
Detection of heavy chain diseases in Hong Kong, 1984–85, *K. N. Ho, J. Jones, K. C. Li and S. Y. Tsai* 130–136
A rapid enzyme-linked immunosorbent assay (ELISA) for IgG antibodies to *Candida albicans*: preliminary studies in duodenal ulcer patients, *A. L. Sinclair, A. P. Burford-Mason and D. K. Watkins* 137–140
Generation of cytotoxic T cells to cytomegalovirus in patients with cervical intraepithelial neoplasia, *W. A. Neill and E. P. Miller* 141–149
Microbiological comparison of a new infra-red blood culture system (Bactec NR 660) and a radiometric system (Bactec 460), *J. E. Corkill and K. Rimmer* 150–159
Red cell antigen typing using eluted antibodies in a modified antiglobulin test, *S. M. Gale* 160–164

ANNOTATIONS
Biochemistry for sick and pre-term neonates, *V. Walker* 165–169
Microbial enzymes in laboratory diagnosis, *P. M. Hammond, R. J. Hinton and M. D. Scawen* 170–177
Quality assurance. 3. External quality assessment, *D. Kilshaw* 178–186

SHORT COMMUNICATIONS

Mesurement of plasma ionised calcium: comparison of calcium-titrated sodium heparin and lithium heparin as anticoagulants, *J. Burns, R. W. G. Law and C. R. Paterson* 187–189

Automatic measurement of mean platelet volume, *D. Reardon, D. Hutchinson and A. Trowbridge* 190–191

A double labelling technique for the analysis of lymphocyte sub-sets on a single laser flow cytometer, *E. P. Miller, E. F. Ramage, A. E. Dewar and A. S. Krajewski* 192–195

THESIS SUMMARIES 196–197

LETTER TO THE EDITOR 198

BOOK REVIEWS 199–206

Volume 44 Number 3 July 1987

ORIGINAL ARTICLES

The ESR re-examined, *R. A. Lugton* 207–214

Anti-haemophilic globulin and salivary secretor status in healthy Indians, *D. Mohanty, K. Ghosh, N. Marwaha, A. P. Chauhan and K-C. Das* 215–219

REVIEW ARTICLE

T Lymphocyte surface molecules: structure and function, *A. D. Blann* 220–236

ANNOTATIONS

Progress in the histochemistry of elastic fibres, *S. L. Mera and J. D. Davies* 237–242

Strategies for investigating thyroid function, *D. G. Goldie* 243–248

The development of luminescence immunoassays, *G. J. R. Barnard and W. P. Collins* 249–266

Hypothesis supporting the primary role of increased platelet activity in atherosclerosis and coronary heart disease, *B. W. G. Rees* 267–271

Ristocetin and von Willebrand factor analysis, *J. Light, C. E. Williams and M. B. P. Entwistle* 272–279

Cryptosporidiosis, *M. Armstrong* 280–284

SHORT COMMUNICATIONS

A survey of the incidence of penicillin-resistant β lactamase-negative strains of *Staphylococcus aureus*, *L. Baillie* 285–286

Characterisation of *Aeromonas sp.* in the API ZYM system, *S. J. Gray* 287–289

An improved multipoint technique for the routine microbiological examination of urine specimens, *A. C. Tuck* 290–293

Dot-blot purification of the Kidd blood group antigen, *L. T. Sinor, K. L. Eastwood and F. V. Plapp* 294–296

THESIS SUMMARY 297

LETTERS TO THE EDITOR 298–300

BOOK REVIEWS 301–303

SOFTWARE REVIEW 304

Volume 44 Number 4 October 1987

LEADING ARTICLE

Medical laboratory sciences: past, present and future, *C. H. N. Bennett* 305–306

ORIGINAL ARTICLES

The Feulgen hydrolysis profiles of a metastatic lung tumour in lymph mode and a primary breast carcinoma, *R. G. W. Mays* 307–311

High sensitivity thyrotropin assays in patients with severe non-thyroidal illnesses: a first-line screening test, *D. P. Schutte, W. J. H. Vermaak, W. J. Zakolski and W. J. Kalk* 312–319

Automated haematology: a comparative study of cell counting and sizing using aperture impedance and flow cytometric systems, *D. M. Reardon, D. Hutchinson, L. Bradey and E. A. Trowbridge* 320–325

Intrinsic factor antibody seroconversion, *D. A. Conn* 326–330

An automated technique to measure breakdown products of C3 specificities by peak-rate nephelometry, *M. W. Lowdell and D. R. Bainbridge* 331–333

Counterimmunoelectrophoresis and double immunodiffusion techniques in the detection of *Legionella pneumophilla* antibodies, *M. G. Holliday* 334–340

An evaluation of a new commercial urine transport system, *S. C. W. Matthews* 341–344

Human breast milk: laboratory detection of enzymes, and their use as markers for control of the pasteurisation process, *E. Rees* 345–349

Long term preservation of red cell antibody identification panels in low ionic strength solution, *J. R. Storry* 350–355

Five-day platelet storage: a comparison of *in vitro* function using various blood packs, *J. K. M. Duguid and A. E. Slopecki* 356–360

ANNOTATIONS

Clinical applications of tumour markers, *E. S. Newlands* 361–370

Histopathology and bacteriology: possible developments for the next seventy-five years, *R. T. Allison and L. Rawle* 371–375

Immunology: the sciences and service of the future? *D. J. Rogers* 376–377

The application of robotics in the medical laboratory, *M. Walter* 378–382

The influence of future change on medical laboratory management, *J. Lewis* 383–387

Education in the medical laboratory sciences: the past, the future developments, *R. T. Jones* 388–392

A short history of the Institute of Medical Laboratory Sciences, *A. D. Farr* 393–395

SHORT COMMUNICATIONS

Entamoeba histolytica: demonstration by PAS/Martius yellow technique, *G. Hulman and L. A. Taylor* 396–397

Basic fuchsin homologues. Are pure dyes really necessary? *G. B. Proctor and R. W. Horobin* 398–402

Preparation of chromic chloride solutions for indirect rosetting: a rapid method, *I. D. MacKarill, C. S. Scott, A. N. Stark, H. J. Limbert, P. S. Master, R. A. Jones and A. Earnshaw* 401–404

THESIS SUMMARIES 405–407

BOOK REVIEWS 408–411

SUBJECT AND AUTHOR INDEXES 412–418
